DETAILED ACTION

Allowable Subject Matter

Claims 11 – 24 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the limitations of the claims.

In particular, Gill shows a balun comprising dual balanced outputs and connection wire which may be broadly defined comprising a resistance however, the resistance connection is from the unbalanced input to each one of the balanced port outputs and not connecting between both balanced outputs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gill (US 6,714,094) shows a balun and is the US equivalent of EP 1184931A1 prior art cited by the Applicant.

Goyette shows a lumped element balun layout.
